**SSP:**

We currently have 245 wolves at 42 partner facilities.

We have recommended 29 breeding pairs for the 2020 breeding season. 26 of those pairs happened.

We currently have 104 spaces dedicated for red wolves and we are ~8% above capacity

**SAFE:**

We have 6 new partners committed to creating spaces for red wolves. Brookgreen Gardens, Audubon, Little Rock Zoo, St. Louis Zoo, the Good Zoo in Olgebay, WV and Arkansas State University.

These 6 partners have committed to creating 24 new spaces.

We have 4 more potential partners we are working with to add red wolves.

Current partners have committed to adding 26 new spaces.

There are 51 new spaces committed to red wolves which would bring the capacity of the SSP to between 340 and 350 animals.

The SAFE 3 year goal is to identify 50 new spaces and have capacity for 330 wolves in 3 years. This was accomplished in 6 months.
