

American Red Wolf Partnership Coordination Call – Q2
FWS General Recovery Update
Emily Weller, Fish and Wildlife Service, Red Wolf Recovery Lead
emily_weller@fws.gov

As mentioned on the last call, one of the current focuses for the FWS Red Wolf Recovery Program is updating the Red Wolf Recovery Plan. To help ensure a transparent, joint stakeholder/agency/partner process based on the best scientific information, we are contracting out facilitation and modeling services. That process has started. We received a couple of proposals this week which we are reviewing to determine next steps. We anticipate contracted services to begin in a couple of months.
